### (54) IMAGE PROCESSOR

#### (57)Abstract:

PURPOSE: To prevent paper money, securities, etc., from being forged by deciding that an original to be read is inhibited from being duplicated and converting read image information according to the decision result.

CONSTITUTION: This processor is equipped with a read means 1 which reads the image information out of an original, an image forming means 2 which forms an image of the read image information on a recording medium, a decision means 52 which decides that the original to be read is inhibited from being duplicated, and a conversion processing means 22 which converts the read image information according to the decision result. Therefore, when the image of paper money, securities, etc., which are inhibited from being duplicated is formed, the information is converted and the formed image changes. Consequently, the paper money, securities, etc., are prevented from being forged.

### LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
